AccuTec Medical Division

## A Cut Above

We know that you earn patients' trust and referrals through uncompromising care and improved outcomes. You want your patients to not only recover, but to thrive. That's why when it comes to details, you compromise nothing. Your instruments are mission-critical to your success. AccuThrive's portfolio of high-performing medical blades are engineered with the precision to handle even your most challenging cases.

### Our commitment to you:

- Blades manufactured in the U.S.A.
- Highest standards for safety and quality control
- Consistent top-quality blades
- Innovation through collaboration
- Exceptional customer support

**AccuThrive. Better outcomes begin with better blades.**

## The MicroCoat® Difference

Our commitment to providing specialized solutions begins with our blade coating. All of our surgical, microtome and dermaplaning blades are enhanced through a proprietary process involving steel selection, heat treatment, polymer coating and precision edging to help create a smooth and resistance-free incision. Each MicroCoat variation is specifically engineered for a precise application.

**See how AccuThrive offers blade solutions to help clinicians achieve optimal outcomes.**

**The Magic  
is in the  
MicroCoat!**

Engineered for smooth and  
resistance-free incisions

## **Surgical** *Blades* 1-4

For wound debridement and the  
removal of tough tissue

## **Wound Care** *Blades* 5-6

Designed for comfort,  
control and maneuverability

## **Dermaplaning** *Blades* 7-8

Procedure prep and straight-edge

## **Razors & Prep** *Blades* 9-12

For gross dissection and for use  
in the laboratory

## **Histopathology** *Blades* 13-22

# SURGICAL Blades

## AccuThrive DermaBlade® with MicroCoat

DermaBlade for shave biopsy is designed to give you the flexibility to remove both surface protuberances and deep lesions, while maintaining control throughout the incision. This blade was designed with the input of a dermatologist to create a controlled excision tool with a smooth, sharp edge.

- MicroCoat enrichment – a proprietary polymer coating designed to provide a sharp, smooth blade edge
- Flexibility to remove skin protuberances including moles, warts, skin tags and shave biopsy
- Stability and control with easy-grip sides
- Enhanced user safety designed with finger grips for a no-touch blade

# AccuThrive Surgical Blades with MicroCoat

Proprietary coating formula

Precision-crafted blade

Guaranteed sterile

Made in the U.S.A. 🇺🇸

Our line of specialized surgical blades are coated with a proprietary MicroCoat formula designed for enhanced precision and reduced friction.

- The #10 blade is designed to provide sharpness and durability for large incisions
- The #11 blade is ideal for incisions when a sharp, straight blade is required or a pointed tip is needed to create a puncture incision
- The #15 blade is a smaller version of the #10 blade for precise incisions
- The #15C is angled for hard-to-reach areas

# WOUND CARE Blades

## AccuThrive DebrideBlade® with MicroCoat

The DebrideBlade is used for debridement and removal of hypergranulated and other wound tissue. MicroCoat enrichment gives the blade a precise edge for a smooth, resistance-free debridement. The blade's flexibility and large surface area levels the wound bed to provide a favorable environment for healing of complex and chronic wounds.

- Removes slough, necrotic, eschar and hypergranulation tissue
- Precise leveling of a wound base and periowound, facilitating closure
- For the treatment of large surface areas of complex and chronic wounds
- A specialized MicroCoat enrichment application designed to cut through tough tissue without scraping

# RAZORS *and* PREP Blades

## AccuThrive Single/Double-Edge Prep Blades

Single-edge and double-edge prep blades are essential utility blades for surgical prep.

- MicroCoat for comfort and durability
- 3-facet edge for sharpness
- Individually wrapped for safety
- Made in the U.S.A. 

For more  
information visit  
[AccuThrive.com](https://www.AccuThrive.com)

# AccuThrive Single-Edge Prep Blades

The single-edge prep blade is an essential utility blade for procedure prep.

- MicroCoat technology for comfort and durability
- Corrosion-resistant high quality stainless steel
- Individually wrapped for safety
- Precision-ground and honed for sharpness
- 2.25" length for extra cutting surface
- Fits Weck and other classic hair shaper handles and the Webster skin graft handle

## AccuThrive Double-Edge Prep Blades

The double-edge prep blade is an essential utility blade for procedure prep.

- MicroCoat technology for comfort and durability
- Corrosion-resistant high-quality stainless steel
- Individually wrapped for safety
- Precision-ground and honed for sharpness

# HISTOPATHOLOGY Blades

## AccuThrive Longevity Microtome Blade

Long-Term Sectioning

Preserves sharpness for up to 500 cuts

Made in the U.S.A. 

The Longevity microtome blade for routine sectioning is designed to give you the maximum number of cuts per blade while maintaining high performance. Our coating and heat-treating process produces a blade that helps increase efficiency without sacrificing effectiveness.

- Designed to be effective for long-term sectioning
- Reduces handling frequency, downtime and waste
- Packaged in easy-to-use dispenser
